NATIVE POLLINATOR GARDENS

WRIGHT LIBRARY SUPPORTS THE NATIVE PLANT INITIATIVE

Wright Library supports a community-wide initiative to include native and pollinator plants into the landscape.

Physical garden spaces across the library campus embrace this with plants and educational resources. Programming throughout the year connects the public with national and local experts, providing guidance and instruction. At the library's core is a book and media collection rich with books, articles, videos, and digital resources for anyone wanting to include native and pollinator plants in their own yards.

With the library's mission and core values at the forefront, Wright Library will continue to enhance services like this to the Oakwood community in important and unexpected ways.

WE INVITE YOU TO ENJOY:
